VISHNUTHARAN BAVACHELVAN

B.Sc. (Hons) in Information Technology Undergraduate

vtharan.b@gmail.com • +94 77 364 6391 • Jaffna, Sri Lanka • **GitHub** • **LinkedIn** • **Portfolio**

PROFESSIONAL PROFILE

Information Technology Honours undergraduate at University of Vavuniya with hands-on experience in full-stack web and mobile application engineering, relational/NoSQL databases, and RESTful microservices. Proven track record building production-style applications using Spring Boot, Next.js, React Native, and PostgreSQL. Experienced in collaborative version control, automated testing, containerized deployments, and competitive programming hackathons.

EDUCATION

Faculty of Applied Science, University of Vavuniya | **B.Sc. (Hons) in Information Technology** — **2023 – Present (Expected June 2027)**

- Selected for the **Honours Degree Programme** in 2026 based on academic performance.

TECHNICAL SKILLS

Languages:	Java, JavaScript (ES6+), Python, C++, C, SQL, HTML5, CSS3
Frameworks & Mobile:	Spring Boot, React, Next.js, React Native, Expo, Node.js, Express
Databases & Storage:	PostgreSQL, MongoDB, SQLite, Firebase Realtime Database
Engineering & DevOps:	RESTful APIs, JWT Authentication, Role-Based Access Control, Docker, Git, GitHub Actions, Linux
Testing & Tools:	Postman, Selenium Automation, IntelliJ IDEA, VS Code

TECHNICAL PROJECTS

Buyora | **Full-Stack E-Commerce Platform** [**Repository** | **Verification**] — **May 2026 – June 2026**

Next.js, Spring Boot, PostgreSQL, Docker, REST APIs

- Architected an online store with product filtering, saved favorites, guest shopping carts, and cash-on-delivery tracking.
- Engineered transactional **PostgreSQL** checkout logic in **Spring Boot** with strict stock validation, server-calculated totals, and duplicate-order protection.
- Built administrative screens for product and order lifecycle monitoring; containerized backend services using **Docker**.

GatePilot | **Smart Vehicle & Access Management Prototype** [**Repository** | **Verification**] — **Aug 2026 – Sep 2026**

React Native, Expo, Node.js, Express, MongoDB, Docker

- Developed a mobile access management app in **React Native/Expo** for vehicular entry/exit logs and equipment clearance approvals.
- Implemented an **Express & MongoDB** API with indexed search, account management, and role-based administrative dashboards.

CEB-Management | **Household Electricity Tracker** [**Repository** | **Verification**] — **Jan 2026 – March 2026**

JavaScript, Node.js, Express, SQLite, HTML5/CSS3

- Created an electricity utility tracker managing appliance records, cumulative meter readings, and consumption charts.
- Implemented a dated tariff-based bill estimator, historical billing logs, and responsive light/dark application screens.

TEAM PROJECTS, COMPETITIONS & LEADERSHIP

- **GATEWAY (Gate-Pass System):** Built React UI screens and Express/MongoDB backend endpoints for a semester 3.1 departmental vehicle pass group project. [**Repository**]
- **Lanka Agri-Direct (Produce Directory):** Contributed frontend development, UI design, and API integration testing for a team directory connecting agricultural buyers, producers, and administrators. [**Repository**]
- **Competitive Hackathons & Events:** Competed in **IEEEXtreme 18.0** [**Certificate**] and **IEEEXtreme 17.0** [**Certificate**]; participated in Yarl Salesforce Ohana HACKFORCE '23 [**Certificate**]; attended AIESEC Trailblazers '24 [**Certificate**].
- **Leadership & Volunteering:** IEEEXtreme 18.0 Organizing Committee Member; JamporIEEE Logistics Volunteer; Active Member of IEEE and AIESEC (2023–Present).

CERTIFICATIONS & WORKSHOPS

Cisco Academy:	JavaScript Essentials 1 & 2 (Foundations, Data Structures, OOP, DOM)
Cursor AI / Techloom:	AI-Powered Coding Session Workshop — IEEE Student Branch, Univ. of Vavuniya (Sep 2026) [**Certificate**]
Sololearn:	Introduction to SQL — Relational Querying & Database Design [**Certificate**]
